

RANGER 80™

QUICK START GUIDE

KIT CONTENTS

- (1) Ranger 80 Loading Coil Base
- (1) 9.8' Military Whip
- (1) [Z]QD-RP Radial Puck
- (4) 33' 18ga Radials
- (1) Mounting Spike
- (1) Backpack

The Ranger 80 antenna system arrives ready for deployment in the field. This guide will help you get the antenna set up and ready for tuning. Should you need any further assistance, please contact customer support at support@rezantenna.com.

1 Find a location away from hazards.

2 Drive in spike with rubber mallet.

3 Thread the coil base into the spike.

4 Assemble whip starting at the top.

5 Thread whip into top of coil base.

6 Deploy all 4 radials.

7 Insert radial plugs into radial puck.

8 Connect your coax.

9 Proceed to tuning the antenna.

For tuning instructions, please see the user manual or the Ranger 80 Tuning video. These and other resources can be found at rezantenna.com/support or by scanning the QR code with your smart phone.

We recommend you print out the user manual and keep it with your antenna.
