

# REZ Antenna Systems – Customer Testimonial Recording Guide

---

## Recording Tips

- Keep it short: 20–30 seconds is perfect.
- Record vertically.
- Make sure you have good lighting. Outdoors or near a window works great.
- Speak clearly. Reduce background noise if you can.
- Mention your name, call sign (if you'd like), and where you're operating from.
- Feel free to show your antenna or radio setup in the background!
- No fancy editing needed — just a natural, honest clip.

## Optional Sample Script

Use this as a loose guide if you're not sure what to say:

*"Hi, I'm [Your Name], [Call Sign if applicable], and I've been using the [REZ Antenna Model] for [POTA activations / portable ops / field use / base station use]. It's been [describe your experience briefly — easy to set up, great performance, reliable, etc.]. One of my favorite things about it is [insert favorite feature or benefit]. Thanks REZ Antenna Systems!"*
